

# CANOLA POWER 6-20-5 FOLIAR LEAF FOOD

## SPECIFICATIONS

Guaranteed Analysis:	Total Nitrogen [N] . . . . .	6.00 %
	Available Phosphoric Acid [P <sub>2</sub> O <sub>5</sub> ] . . . . .	20.00 %
	Soluable Potash [K <sub>2</sub> O] . . . . .	5.00 %
	Zinc [Zn] Chelated . . . . .	1.00 %
	Manganese [Mn] Chelated . . . . .	1.00 %
	Boron [B] . . . . .	1.00 %
Derived from:	urea, ammonium hydroxide, monoammonium phosphate, monopotassium phosphate, boric acid, copper EDTA, iron EDTA, manganese EDTA, and zinc EDTA.	
Physical Appearance:	Dark Solution	

## PACKAGING

10 Litre Jug [2/Case], or 1,000 Litre Shuttles

## AGRONOMIC CONSIDERATIONS

Canola Power is a foliar feed product and should be applied to green growing leaves. Canola Power can be applied alone, with crop protection products, or with other fertilizers. May be applied via ground sprayers (high-volume or low-volume), aircraft or fertigation systems.

## GENERAL RECOMMENDATIONS

Use rates vary from 0.75 liters to 4 liters/acre, depending on level of nutrient deficiency. Mixing order should be: [1] Water [2] Canola Power [3] other crop protection products. Apply Canola Power with a minimum of 5 gallons of water per acre.

## MANUFACTURING CONSIDERATIONS

Canola Power is designed for foliar application in canola but can be used in all crops. Canola Power has higher levels of micronutrients than most multi nutrient products. Can be applied in combination with all crop protection products.
