

Nexus Mix-ALL

READ ENTIRE LABEL BEFORE USING THIS PRODUCT

Active Ingredients:

Alkylaryl polyoxyethylene glycol phosphate ester surfactants	70%
Compounds ineffective as spray tank adjuvants	30%
TOTAL:	100%

KEEP OUT OF REACH OF CHILDREN CAUTION

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a Poison Control Center or doctor for treatment advice.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes eye irritation. Avoid contact with eyes.

GENERAL INFORMATION

Nexus Mix-ALL is used to achieve stability and compatibility of pesticides in solution with various liquid fertilizers and/or water. Nexus Mix-ALL also improves the compatibility of micronutrients in liquid fertilizer solutions. Used as directed, Nexus Mix-ALL improves the compatibility of liquid fertilizer - pesticide and aqueous pesticide mixtures. Uniform and stable mixtures ensure accurate pesticide applications with a minimum of agitation. To achieve the desired compatibility and stability, use one of the following methods:

METHOD 1: Add 2/3 of the required fertilizer to a spray tank. Add required amount of Nexus Mix-ALL to liquid fertilizer and begin agitation. Add the required amount of pesticide with the agitator running. Fill spray tank with the remaining volume of liquid fertilizer and continue agitation until contents are thoroughly mixed.

METHOD 2: Add 2/3 of the required fertilizer to a spray tank. Prepare a pre-mix of the desired pesticides in 2 to 3 parts water and the desired amount of Nexus Mix-ALL. Add the pre-mix to the fertilizer with agitator running and fill the spray tank with the remaining volume of liquid fertilizers and thoroughly mix.

High nitrogen fertilizers generally require low concentrations of Nexus Mix-ALL. Medium phosphate or phosphate/potassium solutions usually will require medium to high concentrations of Nexus Mix-ALL. The use of Nexus Mix-ALL will vary with the type of liquid fertilizer and pesticide used. Therefore, a jar test is recommended using proportional quantities of the components to determine stability of the spray tank mixture.

COMPATIBILITY TEST: Into one US gallon (3.78 liters) of liquid fertilizer, add 5 ml. of Nexus Mix-ALL and stir contents thoroughly. Add the appropriate amount of pesticide to the one gallon of liquid fertilizer, mix thoroughly and observe the stability of the solution. Stability for 5 to 10 minutes usually indicates a sufficient amount of Nexus Mix-ALL was added. 40 ml. of pesticide to one US gallon (3.78 liters) of liquid fertilizer approximates one US gallon (3.78 liters) of pesticide to 100 US gallons (3.78 liters) of liquid fertilizer in the field. Five ml. per US gallon approximates 0.5 liters per 100 US gallons (3.78 liters).

USE RATES

PESTICIDES AND LIQUID NITROGEN FERTILIZERS: Solutions consisting of pesticides mixed with a fluid fertilizer containing only Nitrogen and having zero claims for P and K, such as, but not limited to, 20-0-0 or 30-0-0. Mix 0.5 to 1.5 liters per 380 liters.

PESTICIDES AND COMPLETE BLEND LIQUID FERTILIZERS: A fluid fertilizer consisting of the three primary plant nutrients, N-P-K, such as, but not limited to, 10-10-10 or 3-18-18. Mix 1 to 1.5 liters per 380 liters.

PESTICIDES AND LIQUID BLENDS OF MICRONUTRIENTS: Mix 1 to 2 liters per 380 liters.

PESTICIDES AND SOLUTIONS IN WATER: Mix 0.5 to 2.5 liters per 380 liters.

NOTE: If more than one pesticide is to be used, add them in the following sequence: (1) Wettable powders (in slurry form prepared with 2 to 3 parts water). (2) Flowables (diluted with 2 to 3 parts water). (3) Water solubles. (4) Emulsifiable concentrate.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.

Disposal: Wastes may be disposed of on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Offer container for recycling or dispose of container in sanitary landfill, or by other procedures approved by appropriate authorities.

Manufactured for:

NEXUS Ag Business, Inc.

105-3502 Taylor Street East • Saskatoon, SK S7H 5H9
(306)373-2972

Manufactured by Monterey Chemical Company
P.O. Box 35000 • Fresno, CA 93745-5000

CONDITIONS OF SALE AND WARRANTY

NEXUS Ag Business, Inc. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. NEXUS Ag Business, Inc. neither makes, nor authorizes any agent or representative to make, any other warranties, express or implied, including fitness or merchantability.

The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of NEXUS Ag Business, Inc. and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling, storage and use of this material not in strict accordance with directions given herewith. In no case shall NEXUS Ag Business, Inc. or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by NEXUS Ag Business, Inc. and is accepted as such by the Buyer.
