

# NEXUS ZINC SULPHATE GRANULAR

## 35.5% ZINC

### SPECIFICATIONS

Guaranteed Analysis:	Zinc, weight % . . . . .	35.5%
Typical Analysis:	Sulphur, weight % . . . . .	18.00%
Bulk Density:	lbs. per cubic foot . . . . .	105
Particle Size:	Size Guide Number [SGN] . . . . .	225 to 250
Physical Appearance:	White Granules	

### PACKAGING

22.7 Kg Bags, 907 Kg Bags or Bulk

### AGRONOMIC CONSIDERATION

Optimum water solubility provides excellent plant availability and compatibility with all fertilizer blends. Product analysis of 35.5% zinc for use in blends will supply initial amount of zinc sulphate for immediate needs, and for soil buildup and extended plant needs.

### GENERAL RECOMMENDATIONS

Use 2.8 lbs. of Nexus Zinc Sulphate Granular for every pound of zinc required to meet needs. Normally apply at a minimum of 3 lbs. of actual zinc, 8.45 lbs. of product per acre.

### MANUFACTURING CONSIDERATIONS

Normal bulk blending procedures. Use Nexus Zinc Sulphate Granular to match analysis where higher amounts of zinc are needed. Apply in the seed row or in close proximity to the seed row.
