

K-MAG® PREMIUM

0-0-21.5

SPECIFICATIONS

Guaranteed Analysis:	Potash [K ₂ O]	21.5%
	Magnesium [Mg]	11%
	Sulfur [S]	21%
Bulk Density:	lbs. per cubic foot	80
Particle Size:	Size Guide Number [SGN]	260
Physical Appearance:	Brown to dark brown granules	

PACKAGING

Bulk

AGRONOMIC CONSIDERATION

A homogeneous product of potash, sulphate sulphur, and magnesium with a low analysis of magnesium sulphate to insure a better distribution throughout the fertilizer blend and in the field. 100% water soluble to provide excellent plant availability and compatibility with all fertilizer blends. Will supply initial amount of magnesium for immediate needs and for soil buildup and extended plant needs.

GENERAL RECOMMENDATIONS

Use 9 lbs. of K-Mag premium for every pound of magnesium required to meet needs.

Application is generally 5 to 10 lbs of actual magnesium per acre. This would be 45 to 90 lbs. of product.

MANUFACTURING CONSIDERATIONS

Normal bulk blending procedures. Use K-Mag Premium to match analysis where higher amounts of magnesium is needed. Apply in the seed row or in close proximity to the seed row.
